

Alpha and Windows NT Hardware Porting List

Alpha and Windows NT Hardware Porting List

About this Document

This document lists devices that have been ported to Microsoft's Windows NT 4.0 and Alpha. Products listed in this document may or may not be listed in Microsoft's HCL.

Microsoft's HCL can be found at:

<http://www.microsoft.com/hwtest/hcl/>

This Porting List includes Independent Hardware Vendors (IHV) who are developing products for the Alpha Windows NT 4.0 environment and vendors with associated software. Products being developed for the Alpha Windows 2000 environment are not yet listed.

Vendors are listed alphabetically within each category. Contact information is provided in Appendix A.

Porting Status

IDA - product(s) in development for porting to Alpha Windows NT
Compatible - porting has been completed

Note:

This listing has been compiled by Compaq's Independent Hardware Vendors (IHV) Program Office. While every effort has been made to provide accurate and current information, the IHV Program Office cannot be held responsible for any omissions or errors. Also, while products are labeled "Compatible", indicating that porting has been completed successfully, this label is not in anyway endorsing Microsoft's hardware logo level of "Compatible". Please see Microsoft's Hardware Compatibility List at <http://www.microsoft.com/hwtest/hcl/> for Microsoft logo'd products.
